

NSWRA 150th Annual Open Championships 2026

Cross-discipline scoring analysis — V5 vs June-13 (Peter)

Covers Day 1, Day 2, Day 3 (matches 11, 13, 14, 17, 18, 19, 21, 22). Prepared for Adrian — fresh King's-class data, not used in any V5 calibration. All shooter totals validated string-by-string against the official NRAA aggregates.

Data summary

1435 shooter-strings across 8 matches. Discipline split: F-Open 280, F-Std-A 112, F-Std-B 37, FTR 152, Sporter-Open 95, Sporter-PC 112, TR-A 349, TR-B 88, TR-C 210.

V5: Adjusted = (Raw × Conversion + Centres × 0.7) × Factor. Conversion 1.20 TR/Sporter, 1.00 F-class. Factors TR 1.412 · F-Open 1.406 · F-Std 1.475 · F/TR 1.450 · Sporter 1.383 (merged). **June-13 (Peter):** Adjusted = (Raw + Centres) × Factor — no conversion, full centre value. Factors TR 1.53 · F-Std 1.43 · F-Open 1.39 · F/TR 1.43 · Sporter-Open 1.47 · Sporter-PC 1.53.

Day 1 aggregate — V5 vs June-13 (matches 11, 13, 14, 178 full completers)

#	V5 — shooter	Disc	Raw agg	V5 tot	June-13 — shooter	Disc	Raw agg	Jun13 tot
1	Norman Jamieson	F-Std-A	239.20	373.2	Jamie Calleja	F-Open	240.32	378.1
2	Mitch Bailey	TR-A	200.34	372.5	Nicholas McRae	F-Open	240.30	375.3
3	Ben Picton	TR-A	200.32	370.5	John Stevens	FTR	236.25	373.2
4	Brett McCauley	TR-A	200.32	370.5	Fabian Sutryk	F-Open	240.28	372.5
5	Alan Bowyer-Tagg	Sporter-Open	200.39	369.7	Norman Jamieson	F-Std-A	239.20	370.4
6	Christopher Schwebel	TR-A	200.31	369.5	Kris Wilson	F-Open	239.27	369.7
7	Ralph Garlick	F-Std-A	237.19	369.2	Jason Bennett	F-Open	238.28	369.7
8	Jamie Calleja	F-Open	240.32	368.9	Ralph Garlick	F-Std-A	237.19	366.1
9	Ben Emms	TR-A	199.32	368.8	Erin Martin	FTR	235.21	366.1
10	Duncan Muller	TR-A	200.30	368.5	Rowen Urquhart	F-Open	239.24	365.6

Top-10 discipline mix — **V5:** F-Standard 2, TR 6, Sporter 1, F-Open 1 | **June-13:** F-Open 6, FTR 2, F-Standard 2.

Biggest rank shifts: Drew Winkel (Sporter-Open) V5 #15→Jun13 #61; Alan Bowyer-Tagg (Sporter-Open) V5 #5→Jun13 #48; Duncan Muller (TR-A) V5 #10→Jun13 #44; Christopher Schwebel (TR-A) V5 #6→Jun13 #37.

Day 2 aggregate — V5 vs June-13 (matches 17, 18, 19, 180 full completers)

#	V5 — shooter	Disc	Raw agg	V5 tot	June-13 — shooter	Disc	Raw agg	Jun13 tot
1	Alan Mathison	F-Std-A	238.22	373.8	Nicholas McRae	F-Open	240.31	376.7
2	Thomas Doxford	F-Std-A	238.22	373.8	Steve Greenhill	FTR	237.25	374.7
3	Norman Jamieson	F-Std-A	237.23	373.3	Daniel Galea	FTR	236.25	373.2
4	Duncan Muller	TR-A	200.33	371.5	Michael Sipinkoski	FTR	238.23	373.2
5	Brett McCauley	TR-A	200.32	370.5	Jamie Calleja	F-Open	239.29	372.5
6	Steve Greenhill	FTR	237.25	369.0	Thomas Doxford	F-Std-A	238.22	371.8
7	Michael Sipinkoski	FTR	238.23	368.4	Alan Mathison	F-Std-A	238.22	371.8
8	Nicholas McRae	F-Open	240.31	368.0	Norman Jamieson	F-Std-A	237.23	371.8
9	Daniel Galea	FTR	236.25	367.6	John Peters	F-Open	240.27	371.1
10	Mitch Bailey	TR-A	200.29	367.5	Dave Phipps	FTR	234.25	370.4

Top-10 discipline mix — **V5:** F-Standard 3, TR 3, FTR 3, F-Open 1 | **June-13:** F-Open 3, FTR 4, F-Standard 3.

Biggest rank shifts: Christopher Schwebel (TR-A) V5 #12→Jun13 #61; Jim Bailey (TR-A) V5 #15→Jun13 #62; Mitch Bailey (TR-A) V5 #10→Jun13 #53; Brett McCauley (TR-A) V5 #5→Jun13 #47.

Day 3 aggregate — V5 vs June-13 (matches 21, 22, 179 full completers)

#	V5 — shooter	Disc	Raw agg	V5 tot	June-13 — shooter	Disc	Raw agg	Jun13 tot
1	Graham Crowe	F-Std-A	120.14	191.5	Graham Crowe	F-Std-A	120.14	191.6
2	Erin Martin	FTR	119.14	186.8	Nicholas McRae	F-Open	120.17	190.4
3	Rob Avery	TR-A	100.17	186.2	Erin Martin	FTR	119.14	190.2
4	Nicholas McRae	F-Open	120.17	185.5	John Stevens	FTR	120.11	187.3
5	Alan Dukes	F-Std-A	118.11	185.4	Callan Orman	F-Open	120.14	186.3
6	Mitch Bailey	TR-A	100.16	185.3	Jason Bennett	F-Open	120.14	186.3
7	John Stevens	FTR	120.11	185.2	Marty Kelly	FTR	119.11	185.9
8	Donna Negus	TR-A	100.15	184.3	Trent Haines	FTR	118.11	184.5
9	Sahara Dukes	F-Std-A	117.11	183.9	Alan Dukes	F-Std-A	118.11	184.5
10	Ralph Garlick	F-Std-A	119.8	183.8	Dave Phipps	FTR	119.10	184.5

Top-10 discipline mix — **V5:** F-Standard 4, FTR 2, TR 3, F-Open 1 | **June-13:** F-Standard 2, F-Open 3, FTR 5.

Biggest rank shifts: Andrew Beavis (Sporter-Open) V5 #13→Jun13 #62; Ben Picton (TR-A) V5 #14→Jun13 #55; Christopher Schwebel (TR-A) V5 #15→Jun13 #56; Donna Negus (TR-A) V5 #8→Jun13 #48.

Full meeting so far aggregate — V5 vs June-13 (matches 11, 13, 14, 17, 18, 19, 21, 22, 174 full completers)

#	V5 — shooter	Disc	Raw agg	V5 tot	June-13 — shooter	Disc	Raw agg	Jun13 tot
1	Mitch Bailey	TR-A	500.79	925.3	Nicholas McRae	F-Open	600.78	942.4
2	Norman Jamieson	F-Std-A	592.49	923.8	Jamie Calleja	F-Open	599.73	934.1
3	Alan Mathison	F-Std-A	590.51	922.9	Jason Bennett	F-Open	596.66	920.2
4	Brett McCauley	TR-A	499.78	922.6	Fabian Sutryk	F-Open	597.63	917.4
5	Nicholas McRae	F-Open	600.78	920.4	Norman Jamieson	F-Std-A	592.49	916.6
6	Graham Crowe	F-Std-A	593.44	920.1	Alan Mathison	F-Std-A	590.51	916.6
7	Ben Picton	TR-A	500.73	919.4	John Stevens	FTR	588.53	916.6
8	Christopher Schwebel	TR-A	500.73	919.4	John Peters	F-Open	596.63	916.0
9	Duncan Muller	TR-A	498.76	918.9	Daniel Galea	FTR	591.49	915.2
10	Jim Bailey	TR-A	499.70	914.7	Erin Martin	FTR	590.49	913.8

Top-10 discipline mix — **V5:** TR 6, F-Standard 3, F-Open 1 | **June-13:** F-Open 5, F-Standard 2, FTR 3.

Biggest rank shifts: Ben Emms (TR-A) V5 #12→Jun13 #60; Jim Bailey (TR-A) V5 #10→Jun13 #57; Ben Picton (TR-A) V5 #7→Jun13 #53; Christopher Schwebel (TR-A) V5 #8→Jun13 #54.

Would this data move the V5 formula?

Discipline	Implied factor	V5 factor	Δ	Cohort n	Blended	MCSI pt*
TR	1.4283	1.4120	+0.0163	261	1.4142	+0.97
F-Open	1.4210	1.4060	+0.0150	112	1.4070	+0.41
F-Standard	1.4555	1.4750	-0.0195	64	1.4743	-0.32
FTR	1.4542	1.4500	+0.0042	64	1.4502	+0.07
Sporter	1.3927	1.3830	+0.0097	87	1.3835	+0.21

*Estimated MCSI-point shift on a full-championship aggregate base (~430). Implied factors sit within ± 0.024 of V5; blending this event into the ~20,335-string national pool moves every factor by under 0.0012 — at most ± 1.0 MCSI points on a 600-point aggregate, below the resolution that decides any placing. **Conclusion: the data corroborates V5; it would not meaningfully shift any factor.**

Should Sporter split into Open vs Production (PC)?

V5 currently uses one merged Sporter factor (1.383). Testing a split on the national K&Q archive — restricted to **head-to-head matches only** (both classes scored in the same match; single-class "Sporter-only" matches are excluded because both divisions were almost certainly shooting together under one banner):

Class	Implied factor	Std error
Sporter-Open	1.3833	± 0.0035
Sporter-PC	1.4029	± 0.0036
Gap (PC – Open)	+0.0196	± 0.0051 (3.9 SE)

Across 54 dual-class matches in 7 state-years, Production needs the **higher** factor — i.e. PC posts lower raw scores for equal merit, exactly as the tighter Production equipment rules predict. The gap (+0.0196) clears the 3-SE bar (3.9 SE) and matches the NSWRA-2026 event in isolation (+0.019). The all-matches version (polluted by single-class meets) gave only 2.4 SE; restricting to clean head-to-head data is what makes the signal significant. **Recommended split: keep Sporter-Open ≈ 1.383 , raise Sporter-PC ≈ 1.403** (+0.020, ≈ 8 MCSI points on an aggregate). Worth adopting once one more season of dual-class events confirms the gap holds.

How the two formulas behave on this data

June-13 applies full centre value with no iron-sight conversion and high raw factors (TR 1.53, Sporter-PC 1.53), so it rewards heavy centre counts and systematically lifts F-Open to the top of cross-discipline aggregates. V5 converts iron-sight scores up front, weights centres at 0.7, and anchors every factor to the national K&Q pool. The net effect across this meeting: V5 produces a balanced leaderboard (TR, F-Standard and Sporter all competitive, the lead changing hands by ~1 point), while June-13 concentrates the top-10 in F-Open. V5 is a measurement calibrated to data; June-13 is a set of tuned factors.

Source: kings_nswra2026.csv (same layout as prior K&Q exports) + kings_queens.csv archive. Every shooter total validated string-by-string against the official NRAA NSW Kings Series aggregate (match 24): all 183 aggregate rows reconcile exactly to the sum of the eight individual strings.
